Department of Real Estate

Your learning is **up-to-date**  
 with **real world** situations.

**Students' viewpoint.** "The Real Estate programme is actually a professional business course in a specialised form. This allows me the flexibility and versatility for my future career options. The course is very experiential. The challenging project work and interactive case studies of real world situations allow me to directly apply the knowledge I've picked up in the classroom. The electronic resources available at the School, industry networking sessions and Student Internship Programmes are also a huge help in preparing me for my future career."

- Yvonne Tan, Year 4 Real Estate student

**real estate.**

shaping the future of real estate
