**THE CURRICULUM**

Our curriculum is designed to be comprehensive and relevant. The focus lies in imparting to students the knowledge and skills required to tackle sustainability challenges in real-world contexts. Our approach is guided by a project-based learning methodology, ensuring that our graduates are not just armed with theoretical knowledge, but can also apply it in practical settings.

**POST-PROFESSIONAL PROGRAMME THAT ADDRESSES THE GLOBAL SUSTAINABILITY CHALLENGE**

The programme is designed to equip students with the necessary skills to become leaders in sustainability. It provides a platform for students to develop their expertise and contribute to solving global sustainability challenges.

**CURRICULUM**

The curriculum is divided into three main sections: Sustainability Science, Sustainability Engineering, and Sustainability Management.

**SUSTAINABILITY SCIENCE**

This section focuses on understanding the underlying principles of sustainability and how they can be applied to real-world problems. It covers topics such as environmental science, economics, and social sciences.

**SUSTAINABILITY ENGINEERING**

This section is designed to teach students how to apply sustainability principles to engineering projects. It covers topics such as renewable energy, sustainable materials, and sustainable design.

**SUSTAINABILITY MANAGEMENT**

This section focuses on the management of sustainability initiatives. It covers topics such as corporate social responsibility, sustainable supply chain management, and sustainable finance.

**ADMISSIONS**

Applications for the programme are accepted on a rolling basis. Interested candidates are encouraged to submit their applications as early as possible.

**STUDY OPTIONS**

The programme offers both full-time and part-time study options. Full-time students can complete the programme in 2 years, while part-time students can complete it in 3 years.
